Professional Experience

Eureka Solutions, Pfastatt, France — 06.2026 – Present

Analyst Developer - IBMi

- Develop and maintain ERP applications on IBM Power i, including enhancements and corrections.
- Analyze requirements, estimate effort and implement solutions following development standards.
- Develop client-specific programs and adapt ERP functionalities to meet customer requirements.
- Perform unit testing, document developments and prepare programs for integration and global testing.
- Provide Level 2 client support by analyzing requests, identifying issues and implementing solutions.

Ziyara Project, Paris, France — 07.2025 – Present

Volunteer Software Engineer

- Developed and maintained two Flutter applications (user-facing and internal admin app).
- Designed and optimized a PostgreSQL database schema using Supabase.
- Implemented secure CRUD operations with Row Level Security (RLS) and managed data flows.
- Delivered new features, bug fixes, and improved codebase architecture for maintainability.

Brothers in Need, Sydney, Australia — 03.2026 – 05.2026

Freelance Software Engineer

- Adapted and deployed the Ziyara Project mobile application to fit operational needs.
- Gathered requirements and produced detailed functional specifications before development.
- Researched and implemented Australian data privacy regulations within application architecture.
- Customized application workflows, database structure, and user management features.

Swiss Aviation Software, Basel, Switzerland — 02.2025 – 08.2025

Data Analyst / Software Engineer - Intern

- Defined behavioral KPIs to support product decision-making for Product Owners and Managers.
- Designed and implemented a real-time user event tracking system in the Flutter application.
- Structured and transformed raw data into datasets for product analytics and UX optimization.
- Collaborated with business teams to align technical metrics with product objectives.

MBT Consulting, Mulhouse, France — 09.2023 – 01.2024

Virtualization & PAM Engineer - Intern

- Deployed and configured Systancia solutions (Gate, Cleanroom, Workplace, Identity).
- Implemented and documented FSLogix and ODFC containers to streamline Office 365 integration.
- Deployed secure virtualized environments and contributed to infrastructure architecture.
- Rebuilt company website using custom HTML modules to improve flexibility.

Education

- **Notos**, *Strasbourg, France* - RPG Developer Analyst (AS400) — 02.2026 – 04.2026
- **EPITA**, *Paris, France* - Master's Degree in Computer Engineering — 09.2020 – 09.2025
- **Bahçeşehir University**, *Istanbul, Turkey* - Academic Exchange (ML, AI, Modeling) — 07.2024 – 01.2025
- **Bahçeşehir University**, *Istanbul, Turkey* - Academic Exchange (Java, C, C++, Python) — 02.2022 – 07.2022

Projects

- **Mini Lakehouse Data Pipeline (Spark, Iceberg, Nessie, AWS):** Designed a pipeline with CSV ingestion to AWS S3 using Spark and Iceberg. Implemented Bronze/Silver/Gold architecture and Nessie table versioning.
- **Customer Review Analysis with PySpark (NLP):** Built a pipeline analyzing a 2M-row Amazon dataset with NLP preprocessing, bigram analysis, and sentiment segmentation.
- **AI Solutions for Consulting & RFP/RFI Automation:** Researched EU consulting market and evaluated custom LLM-based RFP/RFI automation workflows.
- **42sh:** Implemented a Unix shell in C with command parsing, fork/exec, pipes, redirections, and environment variables.
- **Java IDE:** Developed a full-featured Java IDE with editor, compilation console, Git/Maven integration, and autocomplete.

Technical Skills

- **Programming:** Python, Java, C, C++, JavaScript, SQL, Dart, Bash, RPG III, ILE RPG IV, CL/CLLE
- **Data & AI:** Apache Spark, Apache Iceberg, ETL, Pandas, NumPy, Scikit-Learn, TensorFlow, Jupyter
- **Cloud & Databases:** AWS, Docker, PostgreSQL, MongoDB, Neo4j, IBM DB2, Supabase, GitHub Actions CI/CD
- **Methodologies & Languages:** Agile/Scrum, Project Management | English (C1), German (Adv), French & Turkish (Native)
