Professional Experience

Ziyara Project, Paris, France 07.2025 – Present

Volunteer Software Engineer

- Developed and maintained two Flutter applications (user-facing and internal admin app).
- Designed and optimized a PostgreSQL database schema using Supabase.
- Implemented secure CRUD operations with Row Level Security (RLS) and managed frontend–database data flows.
- Delivered new features, bug fixes, and improved the codebase architecture for maintainability and performance.

Brothers in Need, Sydney, Australia 03.2026 – 05.2026

Freelance Software Engineer

- Adapted and deployed the Ziyara Project mobile application to fit the operational needs of the association.
- Gathered requirements and produced detailed functional specifications before development.
- Researched and implemented Australian data privacy regulations within the application architecture.
- Customized application workflows, database structure, and user management features for the organization's use cases.

Swiss Aviation Software, Basel, Switzerland 02.2025 – 08.2025

Data Analyst / Software Engineer - Intern

- Defined behavioral KPIs to support product decision-making for Product Owners and Product Managers.
- Designed and implemented a real-time user event tracking system in the Flutter application.
- Structured and transformed raw data into datasets for product analytics and UX optimization.
- Collaborated with business teams to align technical metrics with product and business objectives.

MBT Consulting, Mulhouse, France 09.2023 – 01.2024

Virtualization & PAM Engineer - Intern

- Deployed and configured Systancia solutions (Gate, Cleanroom, Workplace, Identity).
- Implemented and documented FSLogix and ODFC containers to streamline Office 365 integration.
- Deployed secure virtualized environments and contributed to infrastructure architecture.
- Rebuilt the company website using custom HTML modules to improve flexibility.

Education

- **Notos**, *Strasbourg, France* - RPG Developer Analyst (AS400) 02.2026 – 04.2026
- **EPITA**, *Paris, France* - Master's Degree in Computer Engineering 09.2020 – 09.2025
- **Bahçeşehir University**, *Istanbul, Turkey* - Academic Exchange (ML, AI, Modeling) 07.2024 – 01.2025
- **Bahçeşehir University**, *Istanbul, Turkey* - Academic Exchange (Java, C, C++, Python) 02.2022 – 07.2022

Projects

- **Mini Lakehouse Data Pipeline (Spark, Iceberg, Nessie, AWS)** : Designed a lakehouse data pipeline with CSV ingestion to AWS S3 using Apache Spark and Iceberg. Implemented a Bronze/Silver/Gold architecture and integrated Nessie for table versioning and snapshots.
- **Customer Review Analysis with PySpark (NLP)** : Built a data processing pipeline with Apache Spark to analyze a 2M-row Amazon reviews dataset. Implemented NLP preprocessing (cleaning, tokenization, stopword removal), word frequency and bigram analysis, and sentiment segmentation to identify product trends.
- **AI Solutions for Consulting & RFP/RFI Automation** : Conducted market research on consulting firms in France, Switzerland, and the EU. Explored AI-driven RFP/RFI automation workflows and evaluated custom LLM-based solutions.
- **42sh** : Implemented a Unix shell inspired by Bash in C, including command parsing, execution with fork/exec, pipe and redirection management, builtin commands, and environment variable handling.
- **Java IDE** : Developed a full-featured Java IDE with a code editor, compilation console, project management system, contextual autocomplete, Git/Maven integration, and customizable themes.
- **Collaborative ToDo App** : Built a collaborative full-stack task management application with React, TypeScript, and Supabase, including OAuth authentication and secure CRUD operations with RLS.

Technical Skills

- **Programming:** Python, Java, C, C++, JavaScript, SQL, Dart, Bash, RPG III, ILE RPG IV, CL/CLLE
- **Data & AI:** Apache Spark, Apache Iceberg, ETL, Pandas, NumPy, Scikit-Learn, TensorFlow, Jupyter
- **Cloud & Databases:** AWS, Docker, PostgreSQL, MongoDB, Neo4j, IBM DB2, Supabase, GitHub Actions CI/CD
- **Methodologies:** Agile/Scrum, Project Management, Team Leadership
- **Languages:** English (C1 TOEIC), German (B1), French & Turkish (Native)

Certifications

- **AWS Solutions Architect Associate** - *Udemy* In Progress, 2025
- **Python TensorFlow** - *GreatLearning* 2024
- **Aeronautical Initiation Certificate** - *Strasbourg Academy* 2017
